

ZORE X
CORE SERIES | 9X19

Compatibility

ZORE X is a new and unique concept in gun locking. For it to be compatible with specific gun types, it must meet 2 criteria:

1. Lock properly in the chamber
2. Extract properly from the chamber by charging the gun

Locking

The ZORE X CORE 9x19 properly locks within all 9x19 guns that were tested, with an exception of models with non-standard chamber dimensions. These specific exceptions are:

1. Some of 1911 models (9x19)
2. Beretta M9
3. HK VP9
4. HK P30

We have not identified any other models with this problem. Please refrain from using the lock with the specific gun models mentioned above

Extraction

There are three very important things to keep in mind when ejecting the device:

1. The ZORE-X lock is designed to work properly when there is a loaded magazine in the gun. If you decide to practice such use, it is recommended to use snap caps for your own safety.
2. Charge your gun with the same force as if you were loading a round
3. Keep your fingers away from the ZORE-X lock while charging the firearm.

Compatible

The device is extracted smoothly when loaded properly in most guns on the market. These guns are categorized as compatible.

Not-Compatible

There are weapons in which the device will not be ejected smoothly by charging the gun, but rather would need an additional simple manual action. These weapons are categorized as "Not compatible". If extraction by charging is not necessary for you, you can also use this product for those models.

Compatible***

These models have a method of achieving smooth ejection, for example, by charging the gun with the barrel tilted upwards, or charging with the gun turned sideways, the lock will eject 100% of the times.

We'd like to remind you that ZORE X comes with 30-day satisfaction guarantee. If you are unsatisfied with the product, you can return for a full refund.

Not yet tested

There are thousands of models on the market, we are making every effort to test as many models as possible, as quickly as possible. Completing testing of every single model will take some time. If your weapon is "Not yet tested", you can order it (as long as it's not a 1911 model) and check for yourselves. If you discover the product does not eject from the weapon properly, you can return it for a full refund.
